Introduction

Functional Specification to Article Administration System Document (hereinafter 'Functional Specification') is designed to provide a detailed description of processes and functionality that will be developed in the new software to cover the business needs and to provide business value to the Customer.

The Document covers a detailed description of the functionality to be delivered based on the following documents agreed with the Customer.

Table 1. Reference Documents

Reference Document Link	Reference Document Purpose
<u>CRM Vision Document</u>	The document defines a scope of the project, describes a problem statement and outlines current business process that should be considered during business activities automation.
<u>Releases Description</u>	The document describes an approach to functionality development and describes features included to Release 1 and Release 2.

All the details covered within Functional Specification are subject to implementation. All the changes to the document made after the document is approved, are subject to a separate consideration and estimation.

Glossary

The following terms used in the Functional Specification are described below.

Terms and Abbreviations	Description
Article	Scientific and research articles created by authors and submitted for the review process necessary for the article to be published in the science journals.
Author-Correspondent (Author)	In terms of the system under development - Author who has submitted an Article via system. Such user is considered to be a main point of contact during review workflow.
Co-Author	Author pointed in Co-authors block during Article submission.

Submission	A request from the author to review an Article submitted to a particular journal.
Initial Review	List of checks made by the Managing Editor of a particular journal to define if the Article and its author can proceed with further review process.
Desk Review	A review of the Article made by a definite set of assigned reviewers in terms of a particular journal.
Plagiarism Check	Check made to the Article using third party solutions such as Unicheck Tool or Cross-check tool with the aim to find out if Article is a unique intellectual property.
Double Blind Peer Review	Article check made by assigned reviewers without having information on Article author (s) and any personalisation details. Reviewers' information is also anonymous.
Unicheck Tool	A tool used by the reviewers to check if the Article is a unique one by Managing Editor.
Cross-check Tool	A tool used by the reviewers to check if the Article is a unique one by Managing Editor.
Journal	Legal entity dealing with scientific and research articles publishing activities.
Review Process	Multi-step process aimed at complex check of the Article for its consistency, genuity, validity and uniqueness before the Article is published in the particular journal.

Functional Requirements

System Description

- The system interface should be developed in English.
- Access to the system modules will depend on the roles assigned to each separate user.
- The system has the following structure for Release 1:
 - Registration page,
 - Login page,
 - Reset password page,
 - Submissions list:
 - One submission form,
 - Users list:
 - One user form,
 - Journals List:
 - One journal form,

- My Profile
- Service Pages:
 - About Us,
 - Privacy Policy.
 - Contact Details
- Reviewers list

ROLES

001. User Roles and User Management

GR_#	Requirements Description
GR_001.1	The system should assign a default role 'Reviewer' to the user when registered to the system.
GR_001.2	If the user submits at least one Article the system should automatically assign an 'Author' role to such user.
GR_001.3	All the roles can also be assigned to the user manually by Admin.
GR_001.4	If the user has more than one role at the same time, after login to the system such user should be able to choose the role he wants to use system as.
GR_001.5	If the user has several roles, he / she is logged in by a random role and can choose a needed role from the list.
GR_001.6	The user can have such roles as 'Managing Editor', 'Editorial Board Member', 'Editor', 'Reviewer' in several Journals.
GR_001.7	Publisher's Office role should be assigned to a definite journal. All the notifications sent to the Publisher's Office should be sent to the email of the Publisher's Office assigned to a journal to which an article is submitted.

RM_001 Roles Description

Role Name	Assigned to a Journal (Y/N)	Role Description
Admin	N	• Logs in to the system, • Manages journals, • Manages users and their roles, • Can manage submissions.
Editorial Board Member	Y	• Logs in to the system, • Can be assigned as a reviewer to the submissions within the journal (s) he / she is assigned to. • Can invite the external reviewer within a submission he / she is assigned to.
Chief Managing Editor	N	• Logs in to the system, • Views the list of all submitted Articles within all the journals in the system. • Manages Article submission, • Attaches files to the Article submission.

		Can leave a comment and / or write an email within a submission form.
Managing Editor	Y	- Logs in to the system, - Views the list of submitted Articles within the journals he/she is assigned to. - Views a submitted Article details. - Manages Article phases and statuses, - Attaches files to the Article form. - Can leave a comment and / or write an email within a submission form. - Invites external reviewers to the system.
Editor	Y	- Logs in to the system, - Views all the Articles in read-only format submitted within the journal (s) he / she is assigned to. - Can search and filter the Articles within the the journal (s) he / she is assigned to.
Author	N	- Logs in to the system, - Views the list of submitted Articles - Views the details of any submitted Article by him / her, - Uploads files, replies to emails, writes new email, leaves comment within active Article created by him / her. - Cannot be assigned as a reviewer to the Article submitted him/herself or being a co-author of a submitted Article.
Reviewer	Y/ N	- Logs in to the system, - Can view a limited version of submissions list assigned to him, - Can upload referee report to the submission he / she is assigned to. - Can be assigned to various journals or stay unassigned.
Publisher's Office	N	Can receive notifications on submissions on 'Publishing Process' phase per journal.

REGISTRATION & LOGIN

UC_001 Registration to the System

UCS_001 Use Case Scenario

Preconditions	The system is available for use.
Main Scenario	1. User opens application and clicks 'Register', 2. The system displays registration page, 3. User enters all mandatory fields to the registration form and clicks 'Register' button, 4. The system validates information entered, 5. The system sends the verification email # 1 to the email box of the user, 6. The user confirms the email, 7. The system registers user account with 'Reviewer' role, 8. The system displays a Login Page to the user.
Alternative Scenario 1	4.1.1 Some information is either missing or incorrect, 4.1.2 The system displays validation tooltips to the user, 4.1.3 User enters information correctly, 4.1.4 points 4-6 of the main scenario are done.
Alternative Scenario 2	4.2.1 Entered email already exists in the system, 4.2.2 The system shows a warning lightbox <i>'It seems you do already have an account in the system. Please try to login or reset password'</i>. 4.2.3 The user clicks 'OK' on warning lightbox and performs scenario '<u>Login to system</u>' or '<u>Reset Password</u>'
Result	User is registered in the system.

GR_001 General Requirements

Req #	Description
GR_001.1	During user registration the system should check the user identifiers, such as: • First Name, • Last Name, • Email. If Email is not a unique record in the system, the system should notify the user that account with such email already exists and should not allow to register an account.

S_001.1 Specification of Registration Form Elements

Element Name	Type	Description
<i>Contact Information Block</i>		
First Name*	Text field	The First Name of the user should be entered.
Last Name*	Text field	The Last Name of the user should be entered.
Email*	Email	Email of the user should be entered. Standard validation for email address should be applied. Email from this field is used by the system as a username during login procedure.
<i>Professional Occupation Block</i>		
Degree and Position*	Text field	Scientific degree and position of the user.
Faculty*	Text field	Faculty where the user works.
Department*	Text field	Department where the user works.
University*	Text field	University where the user works.
Areas of interest*	Search field	Area of interests of a person. Search field with autocomplete function. Values should be taken from the dictionary.
<i>Corporate Address Block</i>		
Country*	Search field	Country of the University. Search field with autocomplete function
City*	Text field	City of the University.
Email*	Email	Official email of the University.
Your Personal Webpage at the University	Text field	Personal Web-page of the University (if any).
<i>ID's Block</i>		
ORCID	Text field	16-digit number that is compatible with the ISO Standard (ISO 27729), also known as the International Standard Name Identifier (ISNI), e.g. https://orcid.org/0000-0001-2345-6789
ORCID Link	Link	Link to ORCID application

Researcher ID	Text field	Researcher ID if any.
<i>Password Block</i>		
Enter Password*	Text field	The following validation should be applied: • Min 6 characters, • Min 1 special character, • Min 1 Uppercase character.
Confirm Password*	Text field	Value should be the same as entered to 'Enter Password' field.
<i>Consents Block</i>		
Text about GDPR	Static	Short Text on GDPR We pay a significant attention to the personal data security. With GDPR in force we'd like to ask you to get acquainted with our <u>Privacy Policy document</u> and to allow us processing and storing your personal data left during registration and Article submissions with the following purposes:
Link to Privacy Policy	Link	Link to the Privacy Policy Document.
List of consents*	Checkboxes	The following wording should be present next to each checkbox. I agree that my personal data from registration form and my profile will be used by <u>Article-adminsystem.com</u> • - To use my personal data to register my account. • - To use my personal data to login via ORCID. • - To send notifications and emails on Article review procedures and status. • - To send your Article to the editorial board members and external reviewers according to the review process. • - To use my personal data to login via social networks. • - To send me email notifications related to authorization and account changes. • All the checkboxes should be mandatory for completion.
<i>Actions</i>		
Register	Button	When clicked, new user account with

		Reviewer role is created in the system. If any of the mandatory fields are not completed the system should display validation tooltips and should not allow to register an account.
--	--	---

S_001.2 Specification of Quick Registration Form Elements for External Reviewers after they are invited

Element Name	Type	Description
First Name*	Text field	The First Name of the user should be entered.
Last Name*	Text field	The Last Name of the user should be entered.
Email*	Email	Email of the user should be entered. Standard validation for email address should be applied. Email from this field is used by the system as a username during login procedure.
Areas of interest*	Search field	Area of interests of a person. Search field with autocomplete function. Values should be taken from the dictionary.
ORCID	Text field	16-digit number that is compatible with the ISO Standard (ISO 27729), also known as the International Standard Name Identifier (ISNI), e.g. https://orcid.org/0000-0001-2345-6789
Enter Password*	Text field	The following validation should be applied: • Min 6 characters, • Min 1 special character, • Min 1 Uppercase character.
Confirm Password*	Text field	Value should be the same as entered to 'Enter Password' field.
Consents*	Checkbox	List of consents including consent to be reviewer.
Register	Button	When clicked the user is registers with the default Reviewer Role and is assigned to the journal if invitation was sent by a particular Managing Editor or Editorial Board Member.

UC_002 Login to the system

UCS_002 Use Case Scenario

Preconditions	User is created in the database. User has 'Active' status.
Main Scenario	1. User opens application, 2. The system displays login page, 3. User enters username (email) and password, 4. The system validates credentials entered, 5. The system displays a HomePage to the user.
Alternative Scenario 1	4.1.1 The credentials are not correct, 4.1.2 User goes to reset password function, 4.1.3 Reset Password scenario is done, 4.1.4 Steps 3-5 of the main scenario are done.
Alternative Scenario 2	4.2.1 The user has 'Inactive' status in the system, 4.2.2 The system doesn't allow login and shows message 'You are not allowed to login. For more information please contact system administrator'
Result	User is logged in to the System and views the HomePage according to the role.

S_002.1 Specification of Login Form Elements

Element Name	Type	Description
<i>Fields</i>		
User Name (email)*	Text field	User email registered in the system should be entered.
Password*	Text field	Password created during registration procedure should be entered here.
<i>Action elements</i>		
Sign in	button	Active if username and password are entered and are correct. When clicked the system displays homepage.
Forgot password	link	When clicked the user is transferred to reset password page.

Register	link	When clicked the user is transferred to a registration form.
----------	------	--

S_002.2 Specification of the HomePage Elements for Different Roles

Element	Viewed by	Element Description
Left-side activities panel		
System logo and name	All roles	Not clickable and editable.
<i>User Info Block</i>		
User Name	All Roles	Drop down with the following sub-menu: • My Profile • Role Switcher • Logout
My Profile	All Roles	When clicked the user is transferred to My Profile page.
Role switcher	All Roles	If the user has only one role , the switcher is inactive. Otherwise the drop-down with all the active roles of the user.
Logout	All Roles	When clicked the user is logged out from the system. Login page is displayed.
<i>Menu Block</i>		
Submissions Menu Item	Admin	When clicked, the list of all submissions existing in the system is displayed. Filtering block & cross-search blocks are present and not limited
	Managing Editor	When clicked, the list of submissions to the exact journal (s) to which an Managing Editor is assigned is displayed. Filtering block & cross-search blocks are present. In the filtering block the values in ‘Journals’ & ‘Authors’ filters should be limited to the journals the Managing Editor is assigned to.
	Chief Managing Editor	When clicked, the list of all submissions in the system in the read-only mode is displayed. Filtering block & cross-search blocks are

		present and not limited
	Author	When clicked the list of all submissions ever submitted by the author is displayed. Filtering block & cross-search blocks on Submissions List page are hidden.
	Reviewer	When clicked the list of all submissions to which the reviewer is or had been assigned to is displayed Filtering block & cross-search blocks on Submissions List page are hidden. Such columns as Phase, Status and State are hidden in the Submission list.
	Editor	When clicked, the list of submissions to the exact journal (s) to which an Editor is assigned is displayed in read only mode. Filtering block & cross-search blocks are present. In the filtering block the values in 'Journals' & 'Authors' filters should be limited to the journals the Editor is assigned to.
	Editorial Board Member	When clicked, the list of submissions to which the Editorial Board Member is assigned to. Filtering block & cross-search blocks on Submissions List page are hidden.
Journals menu item	Admin	When clicked the list of journals created in the system is displayed.
Users menu item	Admin	When clicked, the list of users existing in the system is displayed.
Page Main View		
Footer	All Roles	Footer is present on all pages of the system. Admin can view the following information at the Footer of the page • Contact details • Links to the docs: ○ Privacy Policy ○ About Us ○ Contact Details

UC_002.1 Login to the system using ORCID

UCS_002.1.1 Use Case Scenario

Preconditions	User has ORCID account.
Main Scenario	1. User opens application, 2. The system displays login page, 3. User clicks [Log in with ORCID] button, 4. The system checks that the user is logged to the ORCID, 5. The system finds the user account using the ORCID ID from the user profile (if it's filled). 6. The system logs the user in, 7. The system displays a HomePage to the user.
Alternative Scenario 1	4.1. The user is not logged in to the ORCID, 4.2. User logs in to the ORCID, 4.3. points 5-7 of the main scenario are done.
Alternative Scenario 2	5.1. The user is not registered to the system, 5.2. System shows a <u>registration form</u> to the user, and the fields from the form is prefilled with public info from the user ORCID profile. 5.3. System shows a notification with a text: <i>"It seems you haven't registered to Article Administration System yet. Please provide us with a detailed personal info to proceed with the registration."</i> <i>If you already have an account, try to login through the email and update your profile using ORCID ID, and then try ORCID logging in one more time."</i>
Result	User is logged in to the System and views the HomePage according to the role.

UC_003 Reset Password

UCS_003 Use Case Scenario

Preconditions	User is created in the database.
Main Scenario	1. User clicks 'Forgot password' link, 2. The system displays a page with the field for email, 3. User enters email and clicks 'Send', 4. The system shows the message 'Email with instructions is sent to specified email address,' 5. The system sends an email # 2 with the link to a new password generation page to the user email registered in the system. 6. User clicks the link. 7. The system displays a page with the 'new password' and 'confirm new password' fields. 8. User enters and confirms new password.

	9. Steps 1-5 of the <u>UC_001_Login to the system</u> are done
Result	User is logged in to the System.

S_003 Specification of Password Reset Form Elements

Element Name	Type	Description
<i>Fields</i>		
<i>Page 1</i>		
Static Text	Static	<i>'Please enter your email registered in the system. You will receive a link to reset your password to this email'.</i>
Email*	Email	Email registered in the system should be entered by the user.
Send	Button	When clicked the system sends a reset password link to the user's email address.
<i>Reset Password Page</i>		
Static text	Static	<i>'Please enter and confirm your new password here. Please note, that the password should contain min 6 characters, 1 special character, 1 Uppercase character.'</i>
New Password*	Text field	The following validation should be applied: • Min 6 characters, • Min 1 special character, • Min 1 Uppercase character.
Confirm Password*	Text field	The following validation should be applied: • Min 6 characters, • Min 1 special character, • Min 1 Uppercase character. The value entered should be the same as the value entered to "New Password" field.
<i>Action elements</i>		
OK	button	Activated once all the mandatory fields are completed. When clicked the new password should be applied to the user account and Login form should be displayed to the user.

UC _003.1 Users. Email Change in the User Profile

UCS_003.1 Use Case Scenario

Preconditions	User is logged in to the system.
Main Scenario	1. User opens his / her profile, 2. User changes email, 3. The System sends a verification email # 3 to the new email box stated by the user, 4. User confirms email, 5. The system saves changes. 6. The system creates record in the database.
Alternative Scenario	1. Admin opens user profile in the backend, 2. Admin changes email, 3. Steps 3-6 of the main scenario are done.
Result	Email is changes in the user profile.

SUBMISSIONS

UC_004 Submissions. Submissions List

[illegible]

UCS_004 Use Case Scenario

Preconditions	User is logged in to the system. Submissions Overview is displayed.
Main Scenario	1. User sets up values in the filtering block 2. The system displays the list of submissions according to the filtering criteria set up by the User. 3. User clicks 'Set to default' parameter, 4. The system displays the Submissions List with default order of submissions.
Alternative Scenario	2.1. If there are no submissions corresponding to the chosen filtering criteria the system shows the empty list and the statement ' <i>There are no submissions with chosen filtering criteria.</i> '
Result	User has filtered the submissions. The system has updated the list of submissions.

GR_004 General Requirements

Req #	Description
GR_004.1	System should apply values chosen in the filtering block immediately without any additional actions.
GR_004.2	The filtering options for different roles should be limited as described in <u>S_002.2</u>
GR_004.3	On the top of the list of submissions there should always be displayed overdue submissions highlighted with color.
GR_004.4	Below submissions with 'New' status should be displayed.
GR_004.5	All columns in the list should be sortable except for authors column.
GR_004.6	If more than 20 submissions comprise the list a pagination should be applied.
GR_004.7	Such submissions as New and Overdue should be displayed in the submissions filtering block with the counters.
GR_004.8	The default sorting should be as follows: • All overdue submissions regardless the submission status or phase • All new submissions sorted by last activity date (from the oldest to the latest) • All submissions sorted by last activity date (from the oldest to the latest)
GR_004.9	The default view of the submissions list should show all Active (not Published or Rejected) submissions. Archived (Published and Rejected) submissions should be displayed separately.
GR_004.10	The visibility of page elements should be done as specified in the <u>User Rights to Submission List</u>

S_004.1 Specification of Submissions List Elements

Element Name	Type	Description
<i>Filters</i>		
Submission ID	Search field	Autocomplete function should be applied to this field. When at least one character is entered the system should show the list of values containing such character.
Author Name	Search field	Autocomplete function should be applied to this field. When at least one character is entered the system should

		show the list of values containing such character. Search should be provided through author and co-author names.
Select Journal	Search field	Autocomplete function should be applied to this field. When at least one character is entered the system should show the list of values containing such character. Journal
Submission Phase	Drop-down	A drop-down list with the following options: • New Submission Consideration, • Initial Review, • Plagiarism Check, • Desk Review, • Double Blind Peer Review, • Decision Making; • Author's Response; • Publishing Process
Submission Status	Drop-down	A drop-down list with the following options: • In progress (for list of Active submissions); • Author's revision (for list of Active submissions); • Rejected (for list of Archived submissions); • Publication Process (for list of Archived submissions).
Submission Period	Calendar	Two fields with the option to choose From and To dates.
Submission State	Menu items	• New, • Overdue. When clicked on the New menu item the list of submissions should be filtered with all the new submissions. When clicked on the Overdue menu item the list of submissions should be filtered with all the overdue submissions.
Active / Archived	Two radio buttons	• Active shows the list of all submissions excluding Published and Rejected; • Archived shows the list of all Published and Rejected submissions.
<i>Columns</i>		
Submission ID	Column	Sortable. Unique ID of the Article. Submission ID is a set of letters MA and ID from the DB: e.g., MA1, MA113.
Title	Column	Sortable. Title of the Article submitted.

Author	Column	Name of the Author-Correspondent and Co-authors of the Article.
Journal	Column	Sortable. Name of the journal the Article was submitted to.
Phase	Column	Current phase of the Article.
Status	Column	Current status of the submission: • In progress; • Author's revision; • Rejected; • Publication Process. If the submission is Overdue in its status, it should be highlighted additionally.
Submission Date	Column	Date when Article was submitted by the author.
Last action	Column	Date of the last action done about submission's phase or status.
Pagination	-	Pagination should be present on the list if more than 20 submissions are in the list.
Actions		
Set to default	Button	When clicked the system should display a default view of submissions list.
My Journals	Tab	Activated by default. When clicked filtering is done with the limitations per role.
All Journals	Tab	Inactive by default. When clicked the cross -search page is activated.

UC_004.1 Submissions. Submission list. Cross search.

UCS_004.1 Use Case Scenario

Preconditions	User is logged in to the system. Submissions Overview is displayed with all Active submissions.
Main Scenario	1. User sets the switcher on the overview from 'My Journals' to 'All Journals', 2. The system updates the title of the page from 'My Journals' to 'All Journals', 3. The system displays the empty list of submissions with a text 'Nothing is found so far, please start searching to see a result'. 4. User applies 'Title' and / or 'Authors' filters, 5. The system displays the Submissions List according to filters, and the most relevant search results are shown on the top.
Alternative Scenario	4.1. If there are no submissions corresponding to the chosen filtering criteria the system shows an empty list and the statement ' <i>None of our submissions match this search. Try other options</i> '
Result	User has filtered the submissions. The system has updated the list of submissions.

GR_004.1 General Requirements

Req #	Description
<i>Filtering Block</i>	
GR_004.1.1	All the filtering options for the roles assigned to Journals should not be limited to the journal they are assigned to, but submission form can be opened from the list only if Managing Editor has a right to see it.
GR_004.1.2	All columns in the list should be sortable except for 'Authors' column.
GR_004.1.3	If more than 20 submissions comprise the list a pagination should be applied.
GR_004.1.4	The default view of the submissions list includes submissions in all statuses and phases.

GR_004.1.5	'Author and Co-authors' filter should use full-text search.
GR_004.1.6	'Submission title' filter should use full-text search, and there should be a possibility to search by submission title, author and all co-authors at the same time.

S_004.1 Specification of Submissions List Form Elements

Element Name	Type	Description
<i>Filters</i>		
Submission title	Search field	Search should be provided through submission titles as the full-text search. If search is provided using the submission title, search results should be sorted according to the relevance.
Author Name	Search field	Search should be provided through author and co-author names as the usual search (without autocomplete). If search is provided using the name of the author, search results should be sorted by Submission date (newest -> oldest).
Search	Button	When clicked the search values should be applied
<i>Columns</i>		
Submission ID	Column	Sortable. Unique ID of the Article. Submission ID is a set of letters MA and ID from the DB: e.g., MA1, MA113.
Title	Column	Sortable. Title of the Article submitted.
Author- Correspondent / co-authors	Column	Sortable. Name of the Author-Correspondent of the Article and con-authors.
Journal	Column	Sortable. Name of the journal the Article was submitted to.
Phase	Column	Current phase of the submission.
Status	Column	Current status of the submission.
Submission	Column	Date when Article was submitted by the author.

Date		
Last action	Column	Date of the last action done about submission's phase or status.
Pagination	-	Pagination should be present on the list if more than 20 submissions are in the list.

JOURNAL
Investment Management and Financial Innovations

ABSTRACT
Poverty and income inequality are extreme issues that still exist in Malaysia. Any rise in poverty and income inequality definitely affect economic growth. There are many great efforts taken by the government of Malaysia to eradicate poverty and to reduce the gap of income inequality which occurs since 1930's. The incidence of poverty and income inequality is higher in rural areas compared to urban areas. This paper is mainly to study the level of poverty and income inequality in Malaysia together with government intervention to develop Malaysia's economic growth. The research is focused among the working people at Ipoh, Perak. In this paper, questionnaire forms are being distributed to get information regarding the issue of poverty and income inequality. It also looks into the strategies taken by the government of Malaysia to eradicate poverty and income inequality. Few recommendations are given in terms of education policy, financial aid and assistance from government and non-government organisation (NGO) to upgrade the standard and quality of living among the poor and lower-income group of people.

UCS_005.1 One Submission Form View

Preconditions	User is logged in to the system. Submissions Overview is displayed.
Main Scenario	1. User clicks on any submission in the submission list, 2. The system displays one submission form on a separate page.

Result	User opened one submission form
---------------	---------------------------------

UCS_005.2 Emails Overview within a Submission

Preconditions	User is logged in to the system.
Main Scenario	1. User chooses a submission from a submission list, 2. The system opens a submission form, 3. User clicks 'Emails' Tab, 4. The system displays a list of emails.
Result	Emails list is displayed to the user.

UCS_005.3 New Email Creation within a Submission

Preconditions	User is logged in to the system.
Main Scenario	1. Steps 1-4 of scenario UCS_005.1.1 are done. 2. User clicks 'New Email' button, 3. The system displays a new email lightbox, 4. The user fills in all mandatory fields and clicks 'Send' 5. The system displays the email in the email list.
Alternative scenario	4.1.1 User didn't fill in any of required fields, 4.1.2. The system shows validation for not completed fields, 4.1.3. Steps 7-8 of a main scenario.
Result	New email is sent to the receivers, new email is recorded to the email list

UCS_005.4. Reply to the Email in Email Thread within a Submission

Preconditions	User is logged in to the system.
Main Scenario	1. Steps 1-4 of scenario UCS_005.1.1 are done. 2. User clicks on a definite email thread, 3. The system displays an accordion of all emails in the thread, 4. The user clicks on a definite email in the thread, 5. The system displays the email details in the email thread, 6. The user clicks 'Reply' button, 7. The system displays an email reply lightbox, 8. The user fills in the text and clicks 'Send' button, 9. The system sends an email.
Result	New email is sent to the receivers, new email is added to the email

	thread.
--	---------

UCS_005.5 Files Overview within a Submission

Preconditions	User is logged in to the system.
Main Scenario	1. User chooses a submission from a submission list, 2. The system opens a submission form, 3. User clicks 'Files' Tab, 4. The system displays a list of files.
Result	Files list is displayed to the user.

UCS_005.6 Files Download from the Files Tab

Preconditions	User is logged in to the system.
Main Scenario	1. Steps 1-4 of scenario UCS_005.2 are done. 2. User clicks on a file to be downloaded, 3. The system downloads a file to a user's PC. 4. The system logs a download action in Activities Log Tab
Result	The file is downloaded and a corresponding record is created in the Activities Log Tab.

S_005.1 Specification of One Submissions Form Elements. Details Tab

Element Name	Type	Description
<i>General</i>		
Submission ID	Static	A unique ID of the submission applied by the system when a submission was created. Cannot be edited by any user. Submission ID is a set of letters MA and ID from the DB: e.g., MA1, MA113.
Submission Timeline		
Phase	Static	Static names of phases
Phase timeline	Static	Static number of days available for each phase.
Submission date	Static	Date when the submission was created.
Change date	Static	Date when the submission either changes a phase or a status.
Current status	Static	Current status of a submission.
Article Title	Static	Title of the Article. Cannot be edited by Admin.
Authors and co-authors Information	Links	List of authors and co-authors separated by comma. Author should be a link to author;s profile.
Journal	Link	Link to a journal the Article is submitted to.
Article Abstract	Static	Abstract of the Article is defined by the author during Article submission.
<i>Article Attachments</i>		
Upload Article	Button	Always visible for Author during Article submission and when submission status is 'Author's revision. Always visible for Managing Editor. When clicked the standard upload widget is displayed.
Article	Link	Link to the attached Article.

Article Version	Static	Version of the Article applied by the system after an article is attached to the submission. Cannot be edited by the user. Is changed automatically by the system when a new Article is uploaded by the user.
Download Cover Letter sample	Button	When clicked the sample of the cover letter is downloaded.
Upload cover letter	Button	When clicked the standard upload widget is displayed.
Cover Letter	Link	Link to the attached cover letter.
Cover letter Version	Static	Version of the cover letter applied by the system after a cover letter is attached to the submission. Cannot be edited by the user. Is changed automatically by the system when a new cover letter is uploaded by the user.был в шаблоне
Download Referee Report sample	Button	Visible only during Peer Review Phase. When clicked the sample of the referee report is downloaded.
Upload referee report	Button	Visible only during Peer Review Phase. When clicked the standard upload widget is displayed.
Referee Report	Link	Link to the attached Review Report.
Referee Report Version	Static	Version of the review report applied by the system after a cover letter is attached to the submission. Cannot be edited by the user. Is changed automatically by the system when a new cover letter is uploaded by the user.
Upload Permission	Button	Visible only during Initial Review and Plagiarism Check Phases. When clicked the standard upload widget is displayed.
Permission	Link	Link to the attached Permission.
Comment to Author	Text area	Text area where a user can leave comments.
<i>Activities</i>		
Next Phase	Button	The exact name of the button depends on the step of review process and will be described below. When clicked the system transfers the submission to the corresponding step with the 'In progress' status.
Author's Revision	Button	When clicked the system applies Author's revision status and sends notification to the Author.
Reject	Button	When clicked the system displays a template of the

		email.

Journal	Column	Journal to which the user role is assigned.
Status	Column	Status of the role.
Reviewers Pool	Checkbox	Unchecked by default. If checked by Admin -the whole pool of reviewers will be available for the Managing Editor during Peer review Phase and during Reviewers Invitation Processes.
Add role	Button	Should be present next to each role. When clicked a new set of fields 'Role title' , 'Journal' in the lightbox is displayed
Save role	Button	Button, displayed next to each new role
Delete role	Button	Displayed next to each active role. When clicked the warning message 'Do you really want to delete role "yes" / "no". If Yes is clicked the role should be moved to the list of inactive roles. Otherwise the action is cancelled.
<i>Inactive Roles</i>		
Period from	Static	Dd.mm.yy. When the role was assigned to the user.
Period to	Static	Dd.mm.yy. When the role was deprived from the user.

Role	Static	Role title.
User Submissions Tab		
<i>Submissions List</i>		
Submission ID	Column	Sortable. ID of Submission. Link to Submission Form
Submission Title	Column	Sortable. Title of the Article submitted.
Author	Column	Name of the Author and Co-authors of the Article.
Journal Title	Column	Sortable. Journal Title. Link to Journal Form.
Phase	Column	Current phase of the Article.
Submission Status	Column	Sortable. Submission Status
Submission Date	Column	Sortable. Submission Date
Last Action	Column	Sortable. Last action made to the submission

UC _011. Users. New User Creation in Admin Panel

UCS_011 Use Case Scenario

Preconditions	Admin is logged in to the system.
Main Scenario	1. Admin chooses a Users menu item in the left-side activity panel, 2. The system displays a list of all users registered in the system. 3. Admin clicks 'Add new user' button, 4. The System displays a new user card, 5. Admin completes all mandatory fields and clicks 'Save' button, 6. The system creates a new user with reviewer default role 7. The system sends automatic notification # 4 to the created user.
Result	New user is created.

UC _012 Users. Role Assignment to the User in Admin Panel

UCS_021 Use Case Scenario

Preconditions	Admin is logged in to the system.
Main Scenario	1. Admin chooses a Users menu item in the left-side activity panel, 2. The system displays a list of all users registered in the system.

	- Admin chooses a definite user from the list, - The System displays a user card, - Admin opens Role tab and clicks add role button - The system displayed a set of fields for new role adding - Admin chooses a role name and journal from the drop-downs and clicks Save. - The system assigns a role to the user. - The system sends a notification #4 to the user on a new role assignment
Alternative scenario	- The role doesn't require Journal assignment - The system doesn't show 'Journals' drop-down field, - Admin saves data - The system assigns a role to the user.
Result	New role is assigned to the user.

UC _013 Users. Role Deletion from the User in Admin Panel

UCS_013 Use Case Scenario

Preconditions	Admin is logged in to the system.
Main Scenario	- Admin chooses a Users menu item in the left-side activity panel, - The system displays a list of all users registered in the system. - Admin chooses a definite user from the list, - The System displays a user card, - Admin opens Role tab, - Admin clicks delete button next to the needed role, - The system displayed a warning notification, - Admin confirms action, - The system deprives a role from the user and displayed the role in the list of inactive roles of the user. - The system sends a notification #4 to the user on a new role assignment
Alternative scenario	- Admin doesn't confirm the action, - The system cancels the action.
Result	Main scenario: Role is deprived from the user. Alternative scenario: role is not deprived from the user.

S_013 Specification of New User Form Elements

Element Name	Type	Description

General Information Tab		
<i>Contact Information Block</i>		
First Name*	Text field	First Name of the user.
Last Name*	Text field	Last Name of the user.
Email*	Email	Email of the user used as a username during login. Standard email validation should be applied.
Status	Selectbox	The following values are available: • Active (default), • Inactive If user has inactive status - he / she is not able to log in to the system.
<i>Professional Occupation Block</i>		
Degree and Position	Text field	Scientific degree and position of the user.
Faculty	Text field	Faculty where the user works.
Department	Text field	Department where the user works.
University	Text field	University where the user works.
Area of interest*	Dropdown	Drop-down with an autocomplete function. The values should be editable by Admin on a dictionary level.
<i>Business Address Block</i>		
Country	Search field	Country of the University. Search field with autocomplete function
City	Text field	City of the University.
Email	Email	Official email of the University. Standard email validation should be applied.
Your Personal Webpage at the University	Static	Web-page of the University (if any). Standard web address validation should be applied.
<i>ID's Block</i>		
ORCID	Static	16-digit number that is compatible with the ISO Standard (ISO 27729), also known as the International Standard Name Identifier (ISNI), e.g. https://orcid.org/0000-0001-2345-6789
Researcher ID	Static	Researcher ID if any.

Roles Tab		
<i>Active Roles Block</i>		
Role	Column	Name of the role of the user.
Journal	Column	Journal to which the user role is assigned.
Status	Column	Status of the role.
Add role	Button	Should be present next to each role. When clicked a new set of fields 'Role title' , 'Journal' is displayed
Save role	Button	Button, displayed next to each new role
Delete role	Button	Displayed next to each active role. When clicked the warning message 'Do you really want to delete role "yes" / "no". If Yes is clicked the role should be moved to the list of inactive roles. Otherwise the action is cancelled.
<i>Inactive Roles</i>		
Period from	Static	Dd.mm.yy. When the role was assigned to the user.
Period to	Static	Dd.mm.yy. When the role was deprived from the user.
Role	Static	Role title.
User Submissions Tab		
<i>Submissions List</i>		
Submission ID	Column	Sortable. ID of Submission. Link to Submission Form
Submission Title	Column	Sortable. Title of the Article submitted.
Author	Column	Sortable. Name of the Author and Co-authors of the Article.
Journal Title	Column	Sortable. Journal Title. Link to Journal Form.
Phase	Column	Current phase of the Article.
Submission Status	Column	Sortable. Submission Status
Submission Date	Column	Sortable. Submission Date
<i>Actions</i>		
Create	Button	When clicked the user is created.

SUBMISSION MANAGEMENT

UC_014. Step 1. Submission Creation by Author

UCS_014 Use Case Scenario

Preconditions	Author is logged in to the system.
Main Scenario	1. Author clicks 'Submit Article' button on a Submissions Page, 2. The system displays a new Article submission form. 3. Author completes all mandatory fields, attaches documents and clicks 'Submit' button, 4. The system validates all the completed fields in the form, 5. The system creates a new submission in the system, 6. The system updates counter on new submissions for Managing Editor, 7. The system shows successfully sent submission message '<i>Your Article is successfully submitted. You may track submission review progress via submissions list</i>' 8. The system stores info about the co-authors in such a way, that it's possible to provide search through this info using the submission filters; 9. The system sends notification # 6 on new submission to: a. The author-correspondent, b. All authors mentioned in the submission form, c. The Managing Editor of the journal the submission is sent to.
Alternative scenario 1	1. Reviewer clicks 'Submit Article' button on Submission Page, 2. Steps 2-5 from the Main Scenario are provided, 3. System adds role 'Author' to the Reviewer, 4. Steps 6-9 are done.
Result	New Article is submitted to the system for review process.

GR_014 General Requirements

Req #	Description
GR_014.1	When Article submission form is opened, user personal information should be prefilled. The system should allow to edit any of the personal information fields except for the email and ORCID fields.
GR_014.2	Co-authors block should appear in the form only after 'Add co-author'

	button is clicked.
--	--------------------

S_014 Specification of Article Submission Form Elements

Element Name	Type	Description
Journal Selection		
Journal Title*	Search field	Autocomplete function should be applied to this field. When at least one character is entered the system should show the list of values containing such character. It should be possible to make a search only from the list of active journals.
Author - Correspondent Personal Information		
<i>Contact Information Block</i>		
First Name*	Text field	Prefiled. Editable. First Name of the user.
Last Name*	Text field	Prefiled. Editable. Last Name of the user.
<i>Professional Occupation Block</i>		
Degree and Position*	Text field	Prefiled. Editable. Scientific degree and position of the user.
Faculty*	Text field	Prefiled. Editable. Faculty where the user works.
Department*	Text field	Prefiled. Editable. Department where the user works.
University*	Text field	Prefiled. Editable. University where the user works.
<i>Business Address Block</i>		
Country*	Search Field	Prefiled. Editable. Search field with autocomplete function. Country of the University.
City*	Text field	Prefiled. Editable. City of the University.
Email*	Text field	Prefiled. Editable. Official email of the University.
Your Personal Webpage at	Text field	Prefiled. Editable. Web-page of the

the University*		Univercity (if any). Web-address validation should be applied.
<i>ID's Block</i>		
Researcher ID	Text field	Prefiled. Editable. Researcher ID if any.
<i>Actions</i>		
Add Co-author	Button	Should be placed under each block of the submission form. When clicked the following should be done: • new empty Co-author block appears. • Button name changes to 'Remove Co-Author'. If 'Delete Co-Author button is clicked', the Co-Author block should disappear.
Remove Co-author	Button	When clicked, the Co-Author block should disappear.
Co-Author Block		
<i>Contact Information</i>		
First Name*	Text Field	First name of the co-author.
Last Name*	Text Field	Last name of the co-author.
Email*		Email of the co-author.
<i>ID's Block</i>		
ORCID	Text Field	Standard ORCID validation should be applied
Researcher ID	Text Field	Researcher ID.
<i>Professional Occupation Block</i>		
Degree and Position	Text field	Prefiled. Editable. Scientific degree and position of the co-author.
Faculty	Text field	Prefiled. Editable. Faculty of the co-author.
Department	Text field	Prefiled. Editable. Department of the co-author.
University	Text field	Prefiled. Editable. University of the co-author.
<i>Article Details Block</i>		

*(Please attach the Article and cover letter to complete submission
Please make sure that uploaded Article doesn't contain author and co-authors details)*

Article Title*	Text field	Title of the Article should be entered. No limitation of characters should be specified for this field.
Article Abstract*	Text Area	An extract from the Article should be placed here. The limitation of 2000 characters should be applied.
Key words	Text Area	Limited to 10 words.
Attach Article*	Button	When clicked a standard file browse function should appear. The following formats of the file should be allowed: Word, PDF
Article file version	Static	The following logic should be applied to the attached Article version creation: • Each file should contain the subscription ID; • Then 1 letter should be shown, defining the type of the file: ○ m - Article; ○ r - report; ○ c - coverage letter; • Then the version of the file should be stored (as a digit); • Original file name. <i>E.g., 1st version of the Article for submission MA113 would be 'MA113m1_file name.filetype'.</i>
Delete attachment	Button	Disabled, if no attachment exists.
Attach Cover Letter*	Button	When clicked a standard file browse function should appear. The following formats of the file should be allowed: PDF
Download Cover Letter Template	Button	When clicked the template of a cover letter should be downloaded.
Delete attachment	Button	Disabled, if no attachment exists.
Comment to Submission	Text area	Free text area where an author can leave a comment.
<i>Actions</i>		
Submit	Button	When clicked, system checks if all

		mandatory fields are completed and if yes - creates submission in the system. Otherwise - shows incomplete fields to the user.
--	--	---

UC_015. Step 2. Initial Review by Managing Editor

UCS_015 Use Case Scenario

Preconditions	Author has submitted an article. Managing Editor is logged in to Admin Panel
Main Scenario	1. Managing Editor clicks New Submission Filtering option, 2. The system displays the list of new submissions to the Managing Editor. 3. Managing Editor opens a submission form, 4. Managing Editor clicks 'Initial Review' button, 5. The system applies 'Initial Review' phase to the submission. 6. Managing Editor performs initial checks out of the system, 7. Managing Editor clicks 'Plagiarism check' button, 8. The system makes record in the Activity Log Tab of an article form.
Alternative Scenario 1	7.1.1 Initial Check is passed with negative results, 7.1.2 Managing Editor clicks 'Reject' button. 7.1.3 The system displays a lightbox with the email template # 7 7.1.4 Managing Editor edits template and confirms email sending, 7.1.5 The system sends an email # 7 to the Author, 7.1.6 The system records email in the Emails Tab, 7.1.7 The system applies 'Rejected' status to submission, 7.1.8 The system makes record in the Activity Log Tab of an article form.
Alternative Scenario 2	7.2.1 Author needs to review the Article as a result of Initial Check, 7.2.2 Managing Editor clicks 'Author's revision' button. 7.2.3 The system displays a lightbox with the email template # 8, 7.2.4 Managing Editor edits template and confirms email sending, 7.2.5. The system sends an email # 8 to the Author, 7.2.6 The system records email in the Emails Tab, 7.2.7 The system applies 'Author's Revision' status to submission, 7.2.8 The system makes record in the Activity Log Tab of an article form.
Alternative Scenario 3	6.1.1 Initial Check is not done for X days, 6.1.2 The system automatically assigns 'Overdue' state to the submission, 6.1.3 The system sends an automatic notification # 9 to Managing Editor 6.1.4 The system automatically updates the submission list and puts 'Overdue' submission on the top of the list, 6.2.5 The system automatically updates counter on Overdue submissions.

	6.2.6 The system makes record in the Log Tab of an article form.
Result	Main Scenario: Submission is automatically transferred to the Plagiarism check phase of the workflow with 'In progress' status. Alternative Scenario 1: Submission is rejected. The status is set to 'Rejected'. Alternative Scenario 2: status of the submission is updated by the system. The status is set to 'Author's revision'. Alternative Scenario 3: status of the submission is not updated by the system. The state is set to 'Overdue'.

S_015 Initial Review Step Submission Form Elements

Element Name	Type	Description
<i>Timeline</i>		
Phase	Static	Static names of phases
Phase timeline	Static	Static number of days available for each phase.
Submission date	Static	Date when the submission was created.
Change date	Static	Date when the submission either changes a phase or a status.
Current status	Static	Current status of a submission.
<i>Submission General Tab</i>		
Title	Static	Article title
Authors & Co-authors	Static / link	Author-correspondent and co-authors should be enumerated. If the user exists in the database the name should be a link to the user profile. Otherwise names should be static text.
Journal	Static	Name of the journal to which the Article is submitted.
Abstract	Static	The abstract of the Article.
Article attachment	file	The latest uploaded file of an article.
Upload Article	Button	When clicked a standard file upload widget should be displayed.
Cover Letter attachment		The latest uploaded file of a cover letter.

Upload cover letter	Button	When clicked a standard file upload widget should be displayed.
Upload Permission	Button	When clicked a standard file upload widget should be displayed.
Permission Attachment		Uploaded file of a permission.
Comment to author	Text area	Only comment to the author from Managing editor or vice versa be created in this block. No limitation of characters should be done.
<i>Submission Actions - 'New Submission Consideration' Phase</i>		
Initial Review		
Author's Revision	Button	When clicked the submission status is set to 'Author's revision'
Rejected	Button	When clicked - the submission status is 'Initial Review'. State 'Rejected' is assigned to submission.
<i>Submission Actions - 'Initial Review' Phase</i>		
Plagiarism check	Button	When clicked - the submission status is changed to 'Plagiarism check with 'In progress' status.
Author's Revision	Button	When clicked the submission status is set to 'Author's revision'
Reject	Button	When clicked - the submission status is 'Initial Review'. State 'Rejected' is assigned to submission.

UC_016. Initial Review. Author's Revision

Possible Action	Action Result
Upload new Article file	- The system applies a new version to the file. - The system updates Article file field with the latest file version.
Leave a comment to Managing Editor	The system keeps a record of a left comment in the submission form.
Submit	- The system notifies the Managing Editor on submission update by the author with notification #10 - The system applies 'In progress' status within current phase of a submission.

UC_017. Step 3. Plagiarism Check

UCS_017 Use Case Scenario

Preconditions	Author's submission has passed Initial Review Phase.
Main Scenario	1. Managing Editor chooses a required Submission from Submissions list, 2. The system displays a submission form. 3. Managing Editor clicks 'Plagiarism Check' button, 4. The system makes record in the Log Tab of an article form,
Alternative Scenario 1	3.1.1 Plagiarism Check is passed with negative results, 3.1.2 Managing Editor clicks 'Reject' button. 3.1.3 The system displays a lightbox with the email template # 7 3.1.4 Managing Editor edits template and confirms email sending, 3.1.5 The system sends an email # 7 to the Author, 3.1.6 The system records email in the Emails Tab, 3.1.7 The system applies 'Rejected' status to submission 3.1.8 The system makes record in the Log Tab of an article form.
Alternative Scenario 2	3.2.1 Plagiarism Check is not done for X days, 3.2.2 The system automatically assigns 'Overdue' state to the submission, 3.2.3 The system automatically updates the submission list and puts 'Overdue' submission on the top of the list, 3.2.4 The system automatically updates counter on Overdue submissions. 3.2.5 The system sends an automatic notification # 9 to Managing Editor 3.2.6 The system makes record in the Log Tab of an article form
Result	Main Scenario: Submission is automatically transferred to the Desk Review phase of the workflow with 'In progress' status'. Alternative Scenario 1: Submission is rejected. Alternative Scenario 2: Status of the submission is not updated by the system. The state is set to 'Overdue'.

S_017 Plagiarism Check Step Submission Form Elements

Element Name	Type	Description
<i>Timeline - the same as <u>S_015</u></i>		

<i>Submission General Tab - the same as <u>S_015</u></i>		
<i>Submission Actions</i>		
Comment to author	Text area	No limitation of characters should be done.
Desk Review	Button	When clicked - the submission phase is changed to 'Desk Review' with 'In progress' status.
Author's Revision	Button	Submission stays on 'Plagiarism Check' phase with 'Author's revision' status
Reject	Button	When clicked - tSubmission stays on 'Plagiarism Check' phase with 'Rejected' status.

UC_018. Plagiarism Check. Author's Revision

Possible Action	Action Result
Upload new Article file	- The system applies a new version to the file. - The system updates Article file field with the latest file version.
Upload permission document	The system uploads permission doc and stores it in the files tab.
Leave a comment	The system keeps a record of a left comment in the submission form.
Submit Article update	- The system notifies the Managing Editor on submission update by the author with notification #10 - The system applies 'In progress' status within current phase of a submission.

UC_019. Step 4.1 Desk Review & Transfer to Peer Review

UCS_019 Use Case Scenario

Preconditions	Author's submission has passed Plagiarism check.
Main Scenario	- Managing Editor chooses a required Submission from Submissions list, - The system displays a submission form. - Managing Editor clicks 'Peer Review' button,

	4. Managing Editor assigns reviewers, 5. The system makes record in the Log Tab of an article form, 6. The system hides the following elements: a. Author and Co-author information, b. Cover Letter attached.
Alternative Scenario 1	3.1.1 Desk Review is passed with negative results, 3.1.2 Managing Editor clicks 'Reject' button, 3.1.3 The system displays a lightbox with the email template # 7 3.1.4 Managing Editor edits template and confirms email sending, 3.1.5 The system sends an email # 7 to the Author, 3.1.6 The system records email in the Emails Tab, 3.1.7 The system applies 'Rejected' status to submission 3.1.8 The system makes record in the Log Tab of an article form.
Alternative Scenario 2	3.2.1 Author needs to review the Article as a result of Desk Review, 3.2.2 Managing Editor clicks 'Author's revision' button. 3.2.3 The system displays a lightbox with the email template # 8 3.2.4 Managing Editor edits template and confirms email sending, 3.2.5 The system sends an email # 8 to the Author, 3.2.6 The system records email in the Emails Tab, 3.2.7 The system applies 'Author's Revision' status to submission 3.2.8 The system makes record in the Log Tab of an article form.
Alternative Scenario 3	3.2.1 Desk Review Check is not done for X days, 3.2.2 The system automatically assigns 'Overdue' state to the submission, 3.2.3 The system automatically updates the submission list and puts 'Overdue' submission on the top of the list, 3.2.4 The system automatically updates counter on Overdue submissions, 3.2.5 The system sends an automatic notification # 9 to Managing Editor, 3.2.6 The system makes record in the Log Tab of an article form.
Result	Main Scenario: Submission is automatically transferred to the Peer Review phase with 'In progress' status. All personalised data is hidden. Reviewers are assigned Alternative Scenario 1: Submission is rejected. Alternative Scenario 2: Status of the submission is changed to 'Author's revision'. Alternative Scenario 3: Status of the submission is not updated by the system. The state is set to 'Overdue'.

S_019 Desk Review Step Submission Elements

Element Name	Type	Description
--------------	------	-------------

Submission Details Tab		
<i>Timeline - the same as in <u>S_015</u></i>		
<i>Submission General Tab - the same as in <u>S_015</u></i>		
<i>Submission Actions</i>		
Peer Review	Button	When clicked - the <u>Reviewers Assignment Lightbox</u> is displayed.
Author's Revision	Button	When clicked the submission status is set to 'Author's revision'
Reject	Button	When clicked - the submission phase is Plagiarism Check. Status 'Rejected' is assigned to submission.

UC_020. Step 4.2 Desk Review. Author's Revision

Possible Action	Action Result
Upload new Article file	- The system applies a new version to the file. - The system updates Article file field with the latest file version.
Leave a comment	The system keeps a record of a left comment in the submission form.
Submit Article update	- The system notifies the Managing Editor on submission update by the author with notification #10 - The system applies 'In progress' status within current phase of a submission.

UCS_021 Step 4.3. **Reviewers Initial Invitation** to Submission

Preconditions	Managing Editor clicked 'Peer Review' button on a submission form.
Roles	Managing Editor
Main Scenario	- The system displays Reviewers Assignment Page, - Managing Editor chooses option 'Choose responsible for Article review process', - Managing Editor searches for the reviewers via 'area of interest' search option, - The system shows filtered list of reviewers,

	5. Managing Editor assigns one or several users, 6. Managing Editor clicks 'Send' button, 7. The system displays email template # 12, 8. Managing Editor edits the template and clicks 'Invite' button, 9. The system sends emails to invited users. 10. The System transfers the submission to the 'Peer Review' Phase.
Alternative Scenario	2.1 Managing Editor chooses option 'Choose Editorial Board member to handle review' 2.2. Steps 3-6 of the main scenario are done. 2.3. The system displays email template # 11 2.4 Steps 8-10 of the main scenario are done
Result	Reviewers are invited to the submission. Invitation emails are sent.

GR_021 General Requirements

Req #	Description
GR_021.1	Managing Editor should be able to choose one of two options for reviewers invitation: 1. Choose responsible for Article review process, 2. Choose Editorial Board member to handle review. The first option means that chosen reviewers by the Managing Editor already exist in the system and cannot invite external ones. The second option means that Managing Editor can invite the Editorial Board member and give him / her the right to invite external Reviewers.
GR_021.2	When Managing Editor filters the members to be invited to Article review, the following rules should be validates: • The list of reviewers can comprise the reviewers and Editorial Board Member (s) assigned to the journal of the submission, • The list can comprise reviewers not assigned to the journal if such option is switched on by admin for a particular Managing Editor. • Editorial Board Member (s) of the journal should be visually outlined in the list. • The list should exclude authors and co-authors of the Article.

S_021 Reviewers Initial Invitation Page Elements Description

Element	Type	Description
Filtres		

Review Options	Radio-buttons	One of the following options can be chosen: - Choose responsible for Article review process, - Choose Editorial Board member to handle review.
Area of interest	Search field	Search with autocomplete function should be used. It should be possible to choose more than one area of interest. When a filter is applied the list of reviewers both internal and external should be updated. The list should not include the author and co-authors of the Article under review The list should include the reviewers with Editorial Board Member role only if they are assigned to the journal to which the Article is submitted.
Email	Search field	When entered the list of reviewers should be updated with both internal and external reviewers.
Reviewers list		
First & Last Name	Column	The first and the last name of the reviewer.
Editorial Board Member	Attribute	Applied visually to the reviewers with the role 'Editorial Board Member' of a journal to which the Article is submitted. Editorial Board Members from other journals should not be displayed in the list.
Area of interest	Column	Area of interest of the reviewer.
Email	Column	Email of the reviewer.
Last assignment	Column	Date when the reviewer was last time agreed to review any of the submission in the system. For external Reviewers not registered in the system - last assignment date = registration date in the system.
Statistics	Column	Number of times the reviewers declined and took the invitation to review the Articles for the whole period of his presence in the system.
Assign	Button	Next to each reviewer in the list. When clicked the button changes to 'Unassign' and reviewer is assigned to the submission.
Invite Reviewers	Button	Applied to all chosen reviewers. When clicked the

		email template lightbox appear.
--	--	---------------------------------

UC_022. Step 5.1. Peer Review. Reviewers Response to Invitation

Preconditions	Managing Editor has sent invitations to reviewers.
Main Scenario	1. Each reviewer receives the invitation email, 2. Reviewer clicks 'Agree' link, 3. The system transfers the reviewer to login page, 4. The reviewer logs in to the system, 5. The system shows submission form. 6. The system displays the invitation result to Managing Editor. 7. The system updates statistics on 'agree' ratio for the reviewer.
Alternative Scenario 1	2.1 Reviewer clicks 'Disagree' link, 2.2 The system displays the invitation result to Managing Editor, 2.3 The system blocks both Agree and Disagree links to the reviewer, 2.4. The system updates statistics on 'disagree' ratio for the reviewer.
Alternative Scenario 2	2.1 Reviewer does not click any of the links, 2.2 The system sends a reminder #19 to the invited reviewers and Managing Editor on the necessity to reply to the invitation in X days after the email was sent. 2.3 The system displays negative invitation result to Managing Editor in 3 weeks after invitation has been sent, 2.4 The system blocks both Agree and Disagree links to the reviewer in 3 weeks, 2.5 The system updates statistics on 'disagree' ratio for the reviewer.
Result	Invitation results are received by Managing Editor.

GR_022 General Requirements

Req #	Description
GR_022.1	Each reviewer should receive the email containing the following information: • Title of the Article • Abstract of the Article • Journal of the Article • Deadline for Article review • Links to agree and disagree options. 'Agree' link should stay active for the reviewer till the submission is transferred to the next phase. When clicked the link should lead the

	reviewer to login page. After the reviewer logged in to the system, a corresponding submission page should be displayed. ‘Disagree’ link should stay active until once clicked. Otherwise till till the submission is transferred to the next phase.
--	--

UC_023. Step 5.2. Peer Review. External Reviewers Invitation by Editorial Board Member (Optional Step)

Preconditions	Managing Editor has invited Editorial Board Member to ‘Peer Review’ with the option to invite external users. Editorial Board Member has agreed to invitation.
Main Scenario	1. Editorial Board Member logs in to the system, 2. The system displays the list of submissions assigned to him/ her for peer review, 3. Editorial Board Member chooses a particular project, 4. Editorial Board Member clicks ‘Invite External Reviewers’, 5. The system displays external reviewers invitation lightbox (S_023.2), 6. Editorial Board Member fills in the first, the last names, emails of each external reviewer to be invited and clicks ‘Invite’ button. 7. The system sends emails #12 to each invited person, 8. The system displays the list of invited persons in the submission card for Editorial Board Member only (S_023.1).
Result	External Reviewers are invited to the submission. Invitation emails are sent.

GR_023 General Requirements

Req #	Description
GR_023.1	Option to invite external reviewers should be available to Editorial Board Member any time till the submission is transferred to next phase. Editorial Board Member can invite external reviewers more than ones.
GR_023.2	The list of all external reviewers invited by Editorial Board Member should be displayed to him / her and should not be displayed to the Managing Editor.

S_023.1 Submission Form Elements Description for Editorial Board Member on Peer Review Phase

Element Name	Type	Description
<i>General</i>		
Submission ID	Static	A unique ID of the submission applied by the system when a submission was created. Cannot be edited by any user. Submission ID is a set of letters MA and ID from the DB: e.g., MA1, MA113.
Article Title	Static	Title of the Article. Cannot be edited by Admin.
Journal	Link	Link to a journal the Article is submitted to.
Article Abstract	Static	Abstract of the Article is defined by the author during Article submission.
<i>Article Attachments</i>		
Article	Link	Link to the attached Article.
Article Version	Static	Version of the Article applied by the system after an article is attached to the submission. Cannot be edited by the user. Is changed automatically by the system when a new Article is uploaded by the user.
Download Referee Report sample	Button	Visible only during Peer Review Phase. When clicked the sample of the referee report is downloaded.
Upload referee report	Button	Visible only during Peer Review Phase. When clicked the standard upload widget is displayed.
Referee Report	Link	Link to the attached Review Report.
Referee Report Version	Static	Version of the review report applied by the system after a cover letter is attached to the submission. Cannot be edited by the user. Is changed automatically by the system when a new cover letter is uploaded by the user.
<i>External Reviewers Overview</i>		
First and Last name of reviewer	Column	The first and last name of the reviewer
Reviewer email	Column	Email of the reviewer
Date of invitation	Column	Date when invitation was sent to the reviewer.
Invitation result	Column	The following options can be displayed:

		• Agreed, • Disagreed.
Date of response	Column	Date when a response was provided by the reviewer via clicking one of the links in the invitation email.
Referee report	Column	Attachment of a referee report. If the report is not attached - empty. If attached -can be downloaded.
Referee report date	Column	Date when the report was attached by a reviewer.
<i>Activities</i>		
Invite External Reviewers	Button	When clicked, the external reviewers invitation lightbox should be displayed. Always active during Peer Review Phase.
Submit	Button	When clicked the submission is sent to Managing Editor.

S_023.2 External Reviewers Invitation Lightbox Elements Description

Element	Type	Description
First Name*	Text field	The first name of the reviewer should be entered.
Last Name*	Text field	The first name of the reviewer should be entered.
Email*	Email	Email of the reviewer should be entered. Standard email validation should be applied.
Journal	Selectbox	Disabled during invitation of external reviewer within submission. Journal to which Editorial Board Member is assigned to should be completed and cannot be edited. If invitation is sent outside the submission - select box with the list of journals to which the Managing Editor is assigned. If Managing Editor is assigned only to one journal - the journal is selected by default.
Add more	Button	When clicked one more row with set of fields described above should be displayed.
Invite	Button	When clicked the invitation emails # 12 are sent to the external reviewers

UC_024. Step 5.3. Peer Review. External Reviewers Response to Invitation

Preconditions	Editorial Board Member has sent invitations to external reviewers.
Main Scenario	1. Each reviewer receives the invitation email, 2. Reviewer clicks 'Agree' link, 3. The system checks that the reviewer is already registered to the system, 4. The system transfers the reviewer to login page, 5. The reviewer logs in to the system, 6. The system shows submission form. 7. The system displays the invitation result to Editorial Board Member. 8. The system updates statistics on 'agree' ratio for the reviewer.
Alternative Scenario 1	3.1 The system checks that the reviewer is not registered in the system yet. 3.2 The system shows a reviewer registration page, 3.3. The reviewer registers to the system, 3.4 The system transfers the reviewer to login page, 3.5 steps 5-8 of the main scenario are done.
Alternative Scenario 2	2.1 Reviewer clicks 'Disagree' link, 2.2 The system displays the invitation result to Editorial Board Member, 2.3 The system blocks both Agree and Disagree links to the reviewer, 2.4. The system updates statistics on 'disagree' ratio for the reviewer if such reviewer registered in the system.
Alternative Scenario 3	2.1 Reviewer does not click any of the links, 2.2 The system sends a reminder #19 to the invited reviewers and Managing Editor on the necessity to reply to the invitation in X days after the email was sent. 2.3 The system displays negative invitation result to Editorial Board Member in 5 working days after invitation has been sent, 2.4 The system blocks both Agree and Disagree links to the reviewer in 5 working days, 2.5. The system updates statistics on 'disagree' ratio for the reviewer if such reviewer registered in the system.
Result	Invitation results are received by Editorial Board Member.

UC_025. Step 5.5 Peer Review. Article Revision by Reviewer

Preconditions	At least one reviewer has agreed to review the Article
Main Scenario	1. The reviewer opens submission form

	2. The reviewer downloads referee report sample, 3. The reviewer fills in the referee report and uploads it to the system, 4. The reviewer submits the form, 5. The system does the following: a. saves submitted report, b. deactivates Submit button, c. sends notification # 14 to the inviter on new referee report, d. Updates the list of submitted reports on Managing Editor form view and on Editorial Board Member form view (for external reviewers only).
Alternative Scenario	2.1. The reviewer doesn't upload report for X days, 2.2. The system sends a reminder # 17 to the user.
Result	The reviewer has submitted a report.

S_025 Peer Review Submission Form Elements for Reviewer Role

Element Name	Type	Description
<i>Submission Details Tab</i>		
Title	Static	Article title
Journal	Static	Name of the journal to which the Article is submitted.
Abstract	Static	Abstract of the Article.
Article attachment	File	The latest uploaded file of an article.
Referee Report sample	Button	When clicked the sample of referee report in Word format is downloaded.
<i>Actions</i>		
Upload referee report here	Button	When clicked a standard file upload widget should be displayed. Not visible for an author and other reviewers.
Submit	Button	When clicked, the following should happen: • System saves action in Log tab of a submission, • System updates submitted report for the Managing Editor. • System sends a notification to the reviewer

		inviter.
--	--	----------

UC_026. Step 5.6 Peer Review. Editorial Board Member Consolidates Referee Reports

Preconditions	Editorial Board Member is assigned to the submission with the right to invite external reviewers.
Main Scenario	1. Editorial Board Member chooses a required Submission from Submissions list, 2. The system displays a submission form. 3. Editorial Board Member uploads a document with comment, 4. Editorial Board Member clicks 'Submit' button. 5. The system sends a notification # 14 to the Managing Editor, 6. The system makes record in the Log Tab of an article form.
Alternative Scenario	1.1. Editorial Board Member doesn't upload a document for X days, 1.2 The system sends a reminder # 17 to the user.

GR_026 General Requirements

Req #	Description
GR_026.1	Editorial Board Member can submit the form to the Managing Editor even if no referee reports have been sent by external reviewers or if none of the invited reviewers have agreed to review the Article.

UC_027. Step 5.7 Peer Review. Managing Editor Consolidates Referee Reports

Preconditions	Submission is on Peer Review Phase. At least one referee report has been uploaded either by Editorial Board Member and/or External Reviewers.
Main Scenario	1. Managing Editor chooses a required Submission from Submissions list, 2. The system displays a submission form, 3. Managing Editor analyses the referee reports from the reviewers including external ones (all referee reports can be found by the Managing Editor in File Tab), 4. Managing Editor writes a comment to the Author, 5. Managing Editor clicks 'Author's Revision' button. 6. The system sends an email # 8 to the Author

	7. The system makes record in the Log Tab of an article form.
Alternative Scenario 1	3.1.1 Blind Review is passed with negative results, 3.1.2 Managing Editor leaves a comment, 3.1.3 Managing Editor clicks 'Reject' button. 3.1.4. The system sends an email #7 to the receiver. 3.1.5 The system makes record in the Log Tab of an article form.
Alternative Scenario 2	3.2.1 Blind Review is not done for X days, 3.2.2 The system automatically assigns 'Overdue' state to the submission, 3.2.3 The system automatically updates the submission list and puts 'Overdue' submission on the top of the list, 3.2.4 The system automatically updates counter on Overdue submissions. 3.2.5 The system sends a notification # 18 to the receivers, 3.2.5 The system makes record in the Log Tab of an article form
Alternative Scenario 3	2.3.1 Article does not require improvements based on Blind Review, 2.3.2 Managing Editor clicks 'Decision Making' button, 2.3.3 The system makes record in the Log Tab of an article form.
Result	Main Scenario: Submission acquires 'Author Revision' status. Alternative Scenario 1: Submission is rejected. System sends a notification # 7. Alternative Scenario 2: Status of the submission is not updated by the system. The state is set to 'Overdue'. Alternative Scenario 3: Submission is transferred by the Managing Editor to the Decision Making phase of the workflow with 'In progress' status.

GR_027 General Requirements

Req #	Description
GR_027.1	Managing Editor can transfer the submission to the next phase or status regardless the number of referee reports submitted.
GR_027.2	If Managing Editor has assigned an Editorial Board Member to the submission with the right to invite external reviewers, Managing Editor doesn't see all the invited external reviewers and their referee report statuses. Only progress on reviewers who are invited by the Managing Editor should be displayed to the Managing Editor.

S_027 Submission Form Elements for Managing Editor Role

Element Name	Type	Description
<i>Submission Details Tab as in S_015 + new block 'Referee Reports'</i>		
Previous rounds of peer review - Accordion list of all previous rounds of reviewers reports. <i>Displays only if at least 2 rounds of peer review happened to the submission. When opened the following info should be displayed:</i>		
First and Last name of reviewer	Column	The first and last name of the reviewer
Reviewer email	Column	Email of the reviewer
Date of invitation	Column	Date when invitation was sent to the reviewer.
Invitation result	Column	The following options can be displayed: • Agreed • Disagreed
Date of response	Column	Date when a response was provided by the reviewer via clicking one of the links in the invitation email.
Referee report	Column	Attachment of a referee report. If the report is not attached - empty. If attached -can be downloaded.
Referee report date	Column	Date when the report was attached by a reviewer.
Current round of peer review -List of all the reviewers assigned to the current review round. <i>The data in the list is updated once the reviewer has attached the referee report and submitted it:</i>		
First and Last name of reviewer	Column	The first and last name of the reviewer
Reviewer email	Column	Email of the reviewer
Date of invitation	Column	Date when invitation was sent to the reviewer.
Invitation result	Column	The following options can be displayed: • Agreed • Disagreed
Date of response	Column	Date when a response was provided by the reviewer via clicking one of the links in the invitation email.
Referee report	Column	Attachment of a referee report. If the report is not attached - empty. If attached -can be

		downloaded.
Referee report date	Column	Date when the report was attached by a reviewer.
Actions		
Reject	Button	When clicked - the submission phase is Peer Review. Status 'Rejected' is assigned to submission.
Author's Revision	Button	When clicked the email template is displayed to the Managing Editor. When the email is sent the status 'Author's revision' is applied to the submission.
New Round	Button	When clicked - the submission goes to the new round of review process.
Decision Making	Button	When clicked - the submission goes to the Decision Making Phase.

UC_028. Step 5.8 Peer Review. Author's Revision

Possible Action	Action Result
Upload new Article file	- The system applies a new version to the file. - The system updates Article file field with the latest file version.
Leave a comment	The system keeps a record of a left comment in the submission form.
Submit Article update	- The system notifies the Managing Editor on submission update by the author with notification #10 - The system applies 'In progress' status within current phase of a submission.

UC_029. Step 5.9 Peer Review. Managing Editor Handles Author's Corrections

Preconditions	Author has sent the corrections to the Article
Main Scenario	- Managing Editor opens a submission form, - Managing Editor clicks 'One more round' button,

	3. Managing Editor chooses the reviewers to whom the Article should be sent to review for the second time, 4. The system displays the email templates # 12 or 11 depending on option chosen. 5. The Managing Editor edits template if needed and clicks 'Send' button, 6. The system sends the emails to the chosen reviewers from the list, 7. The system makes record in the Log Tab of an article form, 8. UCs 022 - 025 take place.
Result	The submission is sent to one more round of the review or to the Decision Making Phase.

UC_030. Step 6. Decision Making

UCS_030 Use Case Scenario

Preconditions	Author's submission has passed Peer Review.
Main Scenario	1. Managing Editor chooses a required Submission from Submissions list, 2. The system displays a submission form. 3. Managing Editor leaves a comment to author if necessary, 4. Managing Editor clicks 'Author's Response' button. 5. The system makes record in the Log Tab of an article form.
Alternative Scenario 1	3.1.1 Decision Making is passed with negative results, 3.1.2 Managing Editor fills in results of final review in the Submission Form, 3.1.3 Managing Editor clicks 'Reject' button. 3.1.4 The system displays a lightbox with the email template # 7 3.1.5 Managing Editor edits template and confirms email sending, 3.1.6 The system sends an email to the Author, 3.1.8 The system records email in the Emails Tab, 3.1.9 The system applies 'Rejected' status to submission 3.1.10 The system makes record in the Log Tab of an article form.
Alternative Scenario 2	3.2.1 Decision is not done for X days, 3.2.2 The system automatically assigns 'Overdue' state to the submission, 3.2.3 The system automatically updates the submission list and puts 'Overdue' submission on the top of the list, 3.2.4 The system automatically updates counter on Overdue submissions. 3.2.5 The system sends an automatic notification # 9 to Managing Editor.

	3.2.6 The system makes record in the Log Tab of an article form
Result	Main Scenario: Submission is automatically transferred to the 'Author's Response' phase of the workflow with 'In progress' status. Alternative Scenario 1: Submission is rejected. System does not send automatic notification to the author and co-authors in Release 1. Alternative Scenario 2: Status of the submission is not updated by the system. The state is set to 'Overdue'.

S_030 Decision Making Step of Submission Form for Managing Editor

Element Name	Type	Description
Submission Details Tab		
<i>Timeline - the same as in <u>S_015</u></i>		
<i>Submission General Tab - the same as in <u>S_015</u></i>		
<i>Submission Actions</i>		
Author's Response	Button	When clicked the submission is transferred to Author's Response Phase.
Reject	Button	When clicked - the submission phase is Decision Making. Status 'Rejected' is assigned to submission.

UC_031. Step 7. Author's Response

UCS_031 Use Case Scenario

Preconditions	Author's submission has passed Decision Making Phase.
Main Scenario	1. Author opens a submission form, 2. Author clicks 'Start Publishing Process' button, 3. The system makes record in the Log Tab of an article form, 4. Managing Editor receives the notification # 15.
Alternative Scenario	2.1 Author clicks 'Decline' button 2.2 The system makes record in the Log Tab of an article form, 2.2 Managing Editor receives the notification # 15. 2.3 Managing Editor clicks 'Reject' button on a submission, 2.4 The system makes record in the Log Tab of an article form.
Result	Author has made a decision on Article publication.

S_031 Element for Author's Response Step of the Submission Form Elements for Author

Element Name	Type	Description
Submission Details Tab		
<i>Timeline - the same as in <u>S_015</u></i>		
<i>Submission General Tab - the same as in <u>S_015</u> + Author's Decision field</i>		
<i>Submission Actions</i>		
Start Publishing Process	Button	When clicked, notification is sent to the Managing Editor the submission is transferred to Publishing Process Phase. Buttons become disabled.
Decline	Button	

UC_032. Step 8. Publishing Process (Submission Closure)

Preconditions	Author has submitted a form with decision.
Main Scenario	Author decided to publish the Article - Managing Editor chooses a required Submission from Submissions list, - The system displays a submission form. - Managing Editor clicks 'Publishing Process' button. - The system sends an automatic notification # 16 to the receivers. - The system makes record in the Log Tab of an article form.
Alternative Scenario 1	3.1.1 Author's Decision is not received for X days, 3.1.2 The system automatically assigns 'Overdue' state to the submission, 3.1.3 The system automatically updates the submission list and puts 'Overdue' submission on the top of the list, 3.1.4 The system automatically updates counter on Overdue menu item in the left-side activity panel. 3.1.5 The system sends notification # 9 to the receivers. 3.1.5 The system makes record in the Log Tab of an article form
Result	Main Scenario: Submission is automatically transferred to the 'Publishing Process' phase of the workflow with 'Publishing Process' status. Such workflow is considered to be finished. No other steps can be made to the workflow. Alternative Scenario 1: Submission is rejected. Alternative Scenario 2: Status of the submission is not updated by the

	system. The state is set to 'Overdue'.
--	--

S_032 Element for Submission Closure Step of the Submission Form Elements for Managing Editor

Element Name	Type	Description
Submission Details Tab		
<i>Timeline - the same as in <u>S_015</u></i>		
<i>Submission General Tab - the same as in <u>S_015</u> + Author's Decision field</i>		
Author's Decision	Static	The field is displayed only after an author makes decision. Possible values: • Agreed to start publishing process, • Declined.
<i>Submission Actions</i>		
Publishing Process	Button	When clicked the submission is transferred to Ready for Publishing Process.
Rejected	Button	When clicked - the submission phase is Author's Decision. Status 'Rejected' is assigned to submission.

INVITATION OF REVIEWERS TO THE SYSTEM

UC_033 Managing Editor Views the List of Invited Reviewers

Preconditions	The user has Managing Editor / Admin / Chief Managing Editor role
Main Scenario	1. Managing Editor clicks 'Reviewers' menu item, 2. The system displays the list of reviewers ever invited to the system by this user.
Result	The list of invited reviewers is shown to the Managing Editor

S_033 Specification of Fields for Reviewers Overview

Element Name	Type	Description
<i>Filters</i>		
Journal Title	Search field	Autocomplete function should be applied to this field. When at least one character is entered the system should show the list of values containing such character.
User Name	Search field	Autocomplete function should be applied to this field. When at least one character is entered the system should show the list of values containing such character. Search should be done by user first and last name.
<i>Columns</i>		
User Name	Column	Sortable. First and Last name of the user.
User Email (Username)	Column	Sortable. Email of the user serving a username during login procedure.
Journal	Column	Journal (s) to which the user is assigned as a reviewer.
Invitation Status	Column	Sortable. Status of invitation sent to the reviewer. Possible values: • Invited • Declined • Accepted

UC_034 Managing Editor Sends Invitation to External Reviewers

Preconditions	The user has Managing Editor role
Main Scenario	1. Managing Editor clicks 'Invite External Reviewers' on ReviewersPage, 2. The system displays external reviewers invitation lightbox (S_023.2), 3. Managing Editor fills in the first, the last names, emails of each external reviewer to be invited and clicks 'Invite' button. 4. The system sends emails # 13 to each invited person, 5. The system displays the list of invited persons in the Reviewers list (S_033).
Result	The reviewers are invited by Managing Editor

UC_035 External Reviewers Replies to the Invitation

Preconditions	Managing Editor has sent invitations to external reviewers.
Main Scenario	1. Each reviewer receives the invitation email, 2. Reviewer clicks 'Agree' link, 3. The system checks that the reviewer is already registered to the system, 4. The system transfers the reviewer to login page, 5. The reviewer logs in to the system, 6. The system shows submissions list (if any). 7. The system displays the invitation result to Managing Editor.
Alternative Scenario 1	3.1 The system checks that the reviewer is not registered in the system yet. 3.2 The system shows a reviewer registration page, 3.3. The reviewer registers to the system, 3.4 The system transfers the reviewer to login page, 3.5 steps 5-7 of the main scenario are done.
Alternative Scenario 2	2.1 Reviewer clicks 'Disagree' link, 2.2 The system displays the invitation result to Managing Editor, 2.3 The system blocks both Agree and Disagree links to the reviewer.
Alternative Scenario 3	2.1 Reviewer does not click any of the links, 2.2 The system displays Invited status of invitation in the Reviewers list.
Result	Invitation results are received by Editorial Board Member.

UC_036 Admin Assigns the Full Reviewers Pool to a Definite Managing Editor

Preconditions	Managing Editor is logged in to the system
Main Scenario	1. Managing Editor opens User Profil - Roles Tab, 2. Managing Editor checks a checkbox Reviewers Pool, 3. The system saves changes.
Result	Fool Reviewers Pool is available for choosing reviewers for review process.

AUTOMATIC EMAILS AND NOTIFICATIONS

037 Notifications and Emails Settings

GR_037 General Requirements

GR_#	Requirement Description
GR_037.1	All automatic notifications will be hardcoded and Admin will not be able to manage them via interface.
GR_037.2	The templates specified in this document should be editable by system roles according to the ACL.
GR_037.3	Managing Editor can do the following actions to the email prior to sending: Send it as it is Modify the text of email Skip email sending
GR_037.4	All the automatic notifications and templates which should be used in the system are described below. <u>Automatic Notifications and Email Templates</u>

S_037 Email Templates Setting Page Elements Description

Element Name	Type	Description
<i>Templates List</i>		
Template Name	Static	Static name of the template.
Template Subject	Textfield	Prefilled by default. Editable by Admin
Template Text	Textarea	Textarea for editing email text. Prefilled by default.
Template Placeholders	Static	List of placeholders that can be used in the template
<i>Template attributes</i>		
Status	Radio-button	Should be shown next to each template Active / Deactivated

Non-Functional Requirements

NF_001 System Design

The system is developed using Material Design Template.

<https://demos.creative-tim.com/material-dashboard-pro-react/#/dashboard>

NF_002 Interface Languages

System user interfaces should be displayed in the English Language.

NF_003 System Security

System should be GDPR compliant. A standard security pack should be developed.

NF_004 System Availability

The following browsers should be supported by the system

- Chrome 67.
- Safari 11.1.
- Edge 17.
- Firefox 61.
- Internet Explorer 11.
- Opera 53

NF_005 Interface layout

User interfaces should be correctly displayed on standard screen resolutions:

- 1280 x 1024 pixels
- 1600 x 1200 pixels
- 1366 x 768 pixels

Appendix A

State Transition Diagram

To be published, each submission should pass the list of so-called phases (meaning the processes that should be done by the Managing Editors or his/her colleagues). The list of phases is the following:

- New Submission Consideration;
- Initial review;
- Plagiarism check;
- Desk review;
- Double blind peer review;
- Decision Making;
- Author's Response;
- Publishing Process.

During each phase, any submission could possibly have different statuses. The status describes the current state of the submission, and the person who is responsible for it. The list of statuses is the following:

- **In progress** - meaning that currently, the Managing Editor should work on this subscription during this phase, and he/she is the responsible person;
- **Author's revision** - meaning that the Managing Editor has sent the Article for correction to the Author, and currently the Author is the responsible person;
- **Rejected** - meaning that the decision about the Article rejection was made by the Managing Editor;
- **Publication Process** - one automatic status that should be available on the Publication Process phase only.

Scheme 2. The part of the submission workflow. Submission could be gone to the further phase from the 'In progress' status only.

Scheme 3. The part of the submission workflow. Article could be returned to the Author for the revision on any phase of the submission workflow.

Scheme 4. The part of the submission workflow. Managing Editor could decide to reject the submission on any phase of the submission workflow.

Each status has its own duration (working days of Ukrainian production calendar):

- 'In progress' duration depends on the phase, e.g., for 'Internal review' phase 'In progress' status could last up to 1 day;
- 'Article revision' could last up to 4 days;
- 'Rejected' has no duration.
- 'Publication Process' - appears only on the last phase and is considered to be final status. Has no duration.

The additional attribute that could be applied automatically to any of the statuses (except the 'Rejected'):

- **Overdue** - meaning that the responsible person is delayed to the deadline set by the system in accordance to the duration of each status. E.g., a submission will be highlighted as 'Overdue' in the 'In progress' status of 'Initial review' phase if its status would not be changed during 1 day (24 hours).

Scheme 5. The part of the submission workflow. Overdue state of the 'In progress' status during the 'Initial review' state means that Managing Editor is delayed.

Workflow Steps Duration Matrix

Below is provided information on how much time a submission can be held on each workflow step using 'In progress' status before it will be set to 'Overdue' by the system.

Each duration should be a parameter that can be changed by a development team upon a request from the customer.

Each duration is set in days, 1 day is counted as 24 hours. The system should count the Ukrainian working days only (e.g., if a submission is submitted on August 23, 2018 (friday) at 5pm, Managing Editor can work on it till August 27, 2018 (Monday), 5 pm, as August 24-26 are the days-off in year 2018).

Step Title	Duration
New Submission Consideration	1 day
Initial Check	1 day
Plagiarism Check	1 day

Desk Review	3 days
Double Blind Peer Review - Managing Editor	1 days (starts after all referee reports are submitted)
Double Blind Peer Review - Reviewers (per round)	15 days
Double Blind Peer Review - Reminder to Reviewers and Managing Editor	5 days
Decision Making	2 days
Authors' Response	2 days
Publication Process	No limitation
Author's revision (at any phase)	4 days

Article Files Versions Logic

The following logic should be applied to the attached Article version creation:

- Each file should contain the submission ID;
- Then 1 letter should be shown, defining the type of the file:
 - m - Article;
 - r - report;
 - c - cover letter;
- Then the version of the file should be stored (as a digit);
- Original file name.

E.g., 1st version of the Article for submission MA113 would be 'MA113m1_file name.filetype'.

Area of Interest Dictionary Settings

GR_#	Requirement Description
GR_038.1	Admin should be able to add and edit the values.
GR_038.2	The dictionary should consists of the following elements: ● ID of value ● Value description ● Edit button ● Save button ● Add new button
